

## Review Problems

These problems are designed to help you study. In general, they are more difficult than what will be on the test, but if you understand these ones (and the other problems you've done) you should be well prepared for what I give you on the test. Do your best on them, and be sure to look at the solution to make sure you have the right approach.

Chapters 21:  
Problems 53, 77, 87

Chapter 22:  
Problems 29, 34 and/or 35

Chapter 23:  
Problem 38, 51, 70

Suggestion: Work through the *questions* of each chapter with a classmate, discussing any ones that don't seem obvious.

These problems will not be graded.
