

Homework 3

Due Wednesday July 8

Giancoli Chapter 22:

Problems: 1, 3, 6, 7, 8, 9, 10, 11, 12, 17, 20, 29

Bonus: 47

(Bonus means it won't be the one I grade and I won't dock you for skipping it, but it'll help you if you get it (close to) right. Think of it as a combination of charged planes, which you already know the solution for.)
